AIRPORT SCREENING MEASURES

2019 Novel Coronavirus (COVID-19)

CURRENT AS OF MAY 1, 2020

UNITED STATES

To protect the American people from exposure to the coronavirus, the US Department of Homeland Security issued instructions directing all flights from China and all passengers who have traveled to China within the last 14 days to be routed through one of eleven (11) US airports. US citizens who have been in Hubei Province within 14 days of their return to the US will be subject to up to 14 days of mandatory quarantine to ensure they are provided proper medical care and health screening. US citizens who have been in other areas of mainland China within 14 days of their return to the US will undergo a proactive entry health screening and up to 14 days of self-quarantine with health monitoring to ensure they have not contracted the virus and do not pose a public health risk.

Screening measures were expanded on March 13 to US citizens, as well as permanent residents and immediate family members of US citizens, who have traveled to Austria, Belgium, Czech Republic, Denmark, Estonia, Finland, France, Germany, Greece, Hungary, Iceland, Italy, Latvia, Liechtenstein, Lithuania, Luxembourg, Malta, the Netherlands, Norway, Poland, Portugal, Slovakia, Slovenia, Spain, Sweden, and Switzerland at any time in the past 14 days prior to their arrival to the US. Foreign Nationals (other than immediate family of US citizens, permanent residents, and flight crew) who have traveled in China within 14 days of their arrival to the US, will be denied entry.

The above screening measures were further expanded on March 17 to include US citizens, as well as permanent residents and immediate family members of US citizens, who have traveled to Ireland and the United Kingdom at any time in the past 14 days prior to their arrival to the US.

The United States Government has established enhanced screening procedures and the capacity to quarantine passengers, if needed at airports across the country, with plans to expand to 20 airports. Currently, the 13 US airports that have established screening procedures with quarantine capacity are:

- Boston Logan International Airport (BOS)
- John F. Kennedy International Airport (JFK)
- Chicago O'Hare International Airport (ORD)
- San Francisco International Airport (SFO)
- Seattle-Tacoma International Airport (SEA)
- Daniel K. Inouye International Airport (HNL)
- Los Angeles International Airport, (LAX)
- Hartsfield-Jackson Atlanta International Airport (ATL)
- Washington-Dulles International Airport (IAD)
- Newark Liberty International Airport (EWR)
- Dallas/Fort Worth International Airport (DFW)
- Detroit Metropolitan Airport (DTW)
- Miami International Airport (MIA)
